Chief Executive's Report

News and developments

Deputy Chief Executive

I am pleased to announce that the Board has recently decided to promote Valerie Howell from Chief Operating Officer to Deputy Chief Executive. This is in recognition of the great first year Valerie has had within the Trust and the strengthening of day to day and operational management that she has put in place with Clinical Directors and General Managers. Valerie's portfolio will now be expanded to include all non-clinical services.

Stephanie Marks Diabetes Resource Centre Opening

On Thursday 20th May we are officially opening the Stephanie Marks Diabetes Resource Centre, following a successful fundraising appeal which raised in excess of £1 million since it began in 2003. The new Centre – dedicated to the memory of Stephanie Marks, a local schoolgirl who tragically died from diabetes complications aged only 17 - has been open to patients since 1st April and provides a 'one-stop shop' environment for diabetes patients. The Centre will be officially opened by Sir Ian Botham OBE, Patron of the original appeal, and will be followed by an Open Afternoon for members of the local community after lunch.

Business Planning Day

Following the approval last month of the Corporate Business Plan by the Board, a full Business Planning Day was held earlier this month with Clinical Directors, General Managers and other key senior managers across the Trust. The purpose of the day was to ensure people were fully briefed on the new business plan so they both understood the overall picture and the implications and priorities for their own directorates, and that they would be confident in cascading the key messages down to individual teams. The day also included a workshop to discuss behaviours that we might want to adopt as a Trust to support our new values, the 4 'P's.

Leading Ashford and St Peter's from Good to Great Leadership Programme

This month nominations were sought for 100 people within the Trust to join a new Leadership Programme. Nominations were sought from right across the organisation, not simply from senior management, with the aim of the Trust developing its own leaders who in turn will ensure a positive environment of improvement for our patients. Over 100 nominations were received and the programme will launch officially on 27th May. Those on the programme have been interviewed by senior directors to ensure they understand what the programme will do for them and to make sure we have the right '100' people for this initial round. Further internal leadership programmes are also planned for next year.

Meetings and visits

I attended our second Members' Health Event which focused on Cardiology. I have also attended the North West Surrey Transformation Board and met with the Surrey Chief Executives.

I have held individual meetings with Nick Moberley, Chief Executive of the Royal Surrey County Hospital and with Paul Bennett, Chief Operating Officer at Surrey PCT and also Chair of our local Transformation Board. I have also had my own appraisal with Candy Morris, the Chief Executive of the Strategic Health Authority.

I attended a national conference on the launch of the NHS top leaders and was also present at the South West Thames Orthopaedic Conference which this year was hosted by Ashford and St Peter's. I gave a briefing to our consultants earlier this month on the Corporate Business Plan as part of our wider communication and engagement plan to ensure its key priorities are understood by as many front line staff as possible.

I attended our second Members' Health Event which focused on Cardiology. I have also attended the North West Surrey Transformation Board and met with the Surrey Chief Executives.

I have held individual meetings with Nick Moberley, Chief Executive of the Royal Surrey County Hospital and with Paul Bennett, Chief Operating Officer at Surrey PCT and also Chair of our local Transformation Board. I have also had my own appraisal with Candy Morris, the Chief Executive of the Strategic Health Authority.

I attended a national conference on the launch of the NHS top leaders and was also present at the South West Thames Orthopaedic Conference which this year was hosted by Ashford and St Peter's. I gave a briefing to our consultants earlier this month on the Corporate Business Plan as part of our wider communication and engagement plan to ensure its key priorities are understood by as many front line staff as possible.

Chief Executive's Report

News and developments

Deputy Chief Executive

I am pleased to announce that the Board has recently decided to promote Valerie Howell from Chief Operating Officer to Deputy Chief Executive. This is in recognition of the great first year Valerie has had within the Trust and the strengthening of day to day and operational management that she has put in place with Clinical Directors and General Managers. Valerie's portfolio will now be expanded to include all non-clinical services.

Stephanie Marks Diabetes Resource Centre Opening

On Thursday 20th May we are officially opening the Stephanie Marks Diabetes Resource Centre, following a successful fundraising appeal which raised in excess of £1 million since it began in 2003. The new Centre – dedicated to the memory of Stephanie Marks, a local schoolgirl who tragically died from diabetes complications aged only 17 - has been open to patients since 1st April and provides a 'one-stop shop' environment for diabetes patients. The Centre will be officially opened by Sir Ian Botham OBE, Patron of the original appeal, and will be followed by an Open Afternoon for members of the local community after lunch.

Business Planning Day

Following the approval last month of the Corporate Business Plan by the Board, a full Business Planning Day was held earlier this month with Clinical Directors, General Managers and other key senior managers across the Trust. The purpose of the day was to ensure people were fully briefed on the new business plan so they both understood the overall picture and the implications and priorities for their own directorates, and that they would be confident in cascading the key messages down to individual teams. The day also included a workshop to discuss behaviours that we might want to adopt as a Trust to support our new values, the 4 'P's.

Leading Ashford and St Peter's from Good to Great Leadership Programme

This month nominations were sought for 100 people within the Trust to join a new Leadership Programme. Nominations were sought from right across the organisation, not simply from senior management, with the aim of the Trust developing its own leaders who in turn will ensure a positive environment of improvement for our patients. Over 100 nominations were received and the programme will launch officially on 27th May. Those on the programme have been interviewed by senior directors to ensure they understand what the programme will do for them and to make sure we have the right '100' people for this initial round. Further internal leadership programmes are also planned for next year.

Meetings and visits

I attended our second Members' Health Event which focused on Cardiology. I have also attended the North West Surrey Transformation Board and met with the Surrey Chief Executives.

I have held individual meetings with Nick Moberley, Chief Executive of the Royal Surrey County Hospital and with Paul Bennett, Chief Operating Officer at Surrey PCT and also Chair of our local Transformation Board. The day also included a workshop to discuss behaviours that we might want to adopt as a Trust to support our new values, the 4 'P's.

Leading Ashford and St Peter's from Good to Great Leadership Programme

This month nominations were sought for 100 people within the Trust to join a new Leadership Programme. Nominations were sought from right across the organisation, not simply from senior management, with the aim of the Trust developing its own leaders who in turn will ensure a positive environment of improvement for our patients. Over 100 nominations were received and the programme will launch officially on 27th May. Those on the programme have been interviewed by senior directors to ensure they understand what the programme will do for them and to make sure we have the right '100' people for this initial round. Further internal leadership programmes are also planned for next year.

Meetings and visits

I attended our second Members' Health Event which focused on Cardiology. I have also attended the North West Surrey Transformation Board and met with the Surrey Chief Executives.

I have held individual meetings with Nick Moberley, Chief Executive of the Royal Surrey County Hospital and with Paul Bennett, Chief Operating Officer at Surrey PCT and also Chair of our local Transformation Board. I have also had my own appraisal with Candy Morris, the Chief Executive of the Strategic Health Authority.

I attended a national conference on the launch of the NHS top leaders and was also present at the South West Thames Orthopaedic Conference which this year was hosted by Ashford and St Peter's. I gave a briefing to our consultants earlier this month on the Corporate Business Plan as part of our wider communication and engagement plan to ensure its key priorities are understood by as many front line staff as possible.

Chief Executive's Report

News and developments

Deputy Chief Executive

I am pleased to announce that the Board has recently decided to promote Valerie Howell from Chief Operating Officer to Deputy Chief Executive. This is in recognition of the great first year Valerie has had within the Trust and the strengthening of day to day and operational management that she has put in place with Clinical Directors and General Managers. Valerie's portfolio will now be expanded to include all non-clinical services.

Stephanie Marks Diabetes Resource Centre Opening

On Thursday 20th May we are officially opening the Stephanie Marks Diabetes Resource Centre, following a successful fundraising appeal which raised in excess of £1 million since it began in 2003. The new Centre – dedicated to the memory of Stephanie Marks, a local schoolgirl who tragically died from diabetes complications aged only 17 - has been open to patients since 1st April and provides a 'one-stop shop' environment for diabetes patients. The Centre will be officially opened by Sir Ian Botham OBE, Patron of the original appeal, and will be followed by an Open Afternoon for members of the local community after lunch.

Business Planning Day

Following the approval last month of the Corporate Business Plan by the Board, a full Business Planning Day was held earlier this month with Clinical Directors, General Managers and other key senior managers across the Trust. The purpose of the day was to ensure people were fully briefed on the new business plan so they both understood the overall picture and the implications and priorities for their own directorates, and that they would be confident in cascading the key messages down to individual teams. The day also included a workshop to discuss behaviours that we might want to adopt as a Trust to support our new values, the 4 'P's.
