Keyworker for Colorectal Cancer

Introduction

Your Key Worker / Specialist Nurse

The aim of your key worker is to help co-ordinate your care and provide you with continuity throughout your treatment. Your key worker will do this by acting as a link between you and other members of the multi disciplinary team (MDT) that are involved with your care. Your key worker is also the senior specialist nurse for colorectal cancer - Lynn de Snoo.

The Multi Disciplinary Team for Colorectal Cancer (MDT)

Each patient's care is shared between various members of the MDT. The members of the team include: consultant colorectal surgeons, consultant clinical oncologists, medical staff, clinical nurse specialists, radiologists and pathologists. Once all your investigations have been carried out the team discuss the results in the MDT meeting which is held once a fortnight. A treatment plan is discussed and this will be explained at your out-patient clinic appointment. You may have already been seen in the clinic and given your results in which case Lynn will update you after the meeting and arrange any further appointments that may be required.

The role of the keyworker / specialist nurse

It is appreciated that this is a very worrying time for you and your family and you may experience a wide range of emotions. Often you will come away from a clinic appointment and not remember everything that you were told. Lynn is available to help support you and your family by giving your written information and the opportunity to discuss the treatment plan either on the telephone or in person. She works Monday-Wednesday and can be contacted on **01932 723245**.
